MANUAL_STEPS_FOR_ME.pdf / .txt	Step-by-step guide to your own jobs	Read first	[ ]
Viva_Questions.pdf	20 likely viva questions with short answers	Practise	[ ]

TABLE I: Deliverables in the deliverables folder

Things only you can do

- Confirm the school name on the cover (we used SCHOOL OF COMPUTER SCIENCE AND ENGINEERING) and the course name; write the faculty name where it shows ____.
- Paste the official VIT logo into the empty box on the report cover (we cannot legally copy it).
- Replace [GitHub Link], [Live Website Link], [Demo Video Link] and [Paper Link] in the report, decks and e-mails; put Sharvesh's e-mail where it shows <email>.
- Push the repository to GitHub and enable Pages (Settings -> Pages -> Source: GitHub Actions); upload tracks_full_web.parquet as a Release asset if you want the full data tier.
- Send the three e-mails yourself; check every attachment name and link first.
- Pick a venue (IEEE CONECCT 2027: deadline 15 Dec 2026) and run IEEE PDF eXpress with that conference ID; submit the paper yourself.
- The official Turnitin check is done by VIT or the faculty. Our report is a self-check only and says so on its cover.
- Add to the Outcome Proof only real documents: submission receipt, acceptance e-mail, certificate, Turnitin report.

Run the website locally: cd web && npm ci && npm run dev (http://localhost:5173). Rebuild documents: see Makefile (make report ppt paper proof plagcheck).
